

Sheila Theophanides, OAQ, MRAIC, AIA Intern'l

Sheila Theophanides is a senior associate architect and Director of Healthcare studio with the Montreal firm of Lemay associés [architecture, design]. Sheila has acquired over 24 years of professional experience, more particularly in healthcare and critical care. Her approach to critical care design is based on integrating highly complex technological requirements within the architectural parti to create healing environments sensitive to both patient and staff needs. Sheila played a key role in the award-winning design of the MUHC Montreal General Hospital Intensive Care Unit which was the recipient of the AIA/SCCN/AACN ICU Design Citation 2003. Graduate from McGill University, Sheila also teaches at the McGill University School of Architecture, 2nd year design studio. As director of Healthcare studio, Sheila is responsible for the firm's current healthcare projects, which include the McGill University Health Centre (MUHC) Redevelopment Project of the Glen Campus (PPP) and the Mountain Campus, the CHUM (Centre hospitalier universitaire de Montréal) Research Centre (PPP) and the paediatric Ste. Justine Hospital Redevelopment project amongst others.
